

IQ DISINFECTANT SOLUTION

OVERVIEW

Microorganisms are ubiquitous, and their presence becomes more concerning due to their invisibility and our tendency to underestimate their detrimental impacts. So, what exactly are these microorganisms commonly referred to as germs? They represent the primary culprits behind infections, leading to various diseases. This encompassing group includes bacteria, viruses, fungi, moulds, spores, cysts, and numerous other types.

IQ Green Solutions are encouraging a holistic approach to green, environmentally friendly and non-toxic products used for disinfection. **IQ DISINFECTANT SOLUTION** kills 99.99% of infectious causing germs in all “high touch” areas and general surfaces where routine disinfection is required.

FEATURES

The active ingredient of **IQ DISINFECTANT SOLUTION** is HOCl ($\pm 0.05\%$), a natural forming acid, similar to that produced by our immune systems.

HOCl destroys all germs including bacteria, viruses, fungi, spores, cysts, etc.

Germs cannot build resistance to HOCl due the mode of action in which it eliminates them.

IQ DISINFECTANT SOLUTION can be used for the disinfection of equipment and surfaces in both households and industrial surfaces.
